

Caron E. Gala Bijl, Senior Science Policy Associate

Former Science Policy Intern Caron Gala Bijl is the Society's Policy Programs Coordinator, a full-time position in the Science Policy Office. The position of Programs Coordinator, established in 2007, provides technical support for Science Policy Office programs. Caron develops and manages programs that focus on increasing the visibility of soil, crop, and agronomic sciences in both domestic and international policy circles. Caron provides members with the tools they need to impact Congressional decision making. Caron has a B.S. degree in environmental science with a focus on ecology from the State University of New York College of Environmental Science and Forestry and M.S. in soil chemistry from Virginia Tech. Thus far, she has helped facilitate the development of position statements, organize briefings for both the Congressional Soils Caucus and the Societies, inform Congress during both the annual budget and appropriations process, and advocate for legislation relevant to our sciences.
