AND RELATED AGENCIES APPROPRIATIONS BILL FY2024

Full Committee Markup
House Appropriations Committee
June 22, 2023

**FLEISCHMANN
ENERGY AND WATER**

Adopted W

HOUSE APPROPRIATIONS COMMITTEE

Full Committee Markup

Fiscal Year 2024 Energy and Water Development and Related Agencies
Appropriations Bill

Manager's Amendment

Offered by Mr. Fleischmann of Tennessee

In the report:

On page 34, at the appropriate place, insert the following new paragraph:

Western Everglades Restoration Project (WERP).—The Committee notes that the federal cost share for construction and operation of all essential and necessary water quality features of the Comprehensive Everglades Restoration Plan (CERP) is authorized to be 50 percent. Further, the Committee is aware that stormwater treatment areas constructed under the CERP were determined integral to the federal project and constructed under a 50-50 cost share. The Corps is reminded that stormwater treatment areas and other features found integral to the federal project, including within the WERP, should be constructed consistent with the statutory cost share. Not later than 15 days after enactment of this Act, the Corps shall notify the Committee of the timeline for any relevant determinations and shall notify the Committee as soon as those determinations are made.

On page 91, after the sixth paragraph, insert the following new paragraph:

The Department is directed to provide to the Committee not later than 90 days after enactment of this Act a briefing on an assessment of the effects of EVs on energy demand, consumer costs, critical mineral demand and conservation, grid reliability and integration, and energy security and how varying efficiency of EVs would alter these effects. In conducting the assessment, the Department should seek input from industry and other relevant stakeholders, as appropriate.

On page 94, after the sixth complete paragraph, insert the following new paragraph:

The Committee continues to support efforts to develop a university-based testing facility for industrial prototyping and manufacturing of turbine systems capable of producing upwards of 30 megawatts of power per unit and grid integration efforts for offshore wind turbine capabilities.

On page 97, after the fourth paragraph, insert the following new paragraph:

The Committee supports research and development activities to improve the sustainability and competitiveness of U.S. mining operations, including the beneficial use of byproducts such as capturing excess nitrogen oxide and utilizing it to produce ammonium sulfate fertilizer suitable for agricultural use.

#2

Ranking Member Kaptur
FY24 – Energy & Water
Amendment #1

Amendment to Energy and Water Development and Related Agencies Appropriations Bill
